# The Buxtonia

## Conservation Railing System

# The Buxtonia

## Features

- Hot forged & hand finished by our own blacksmiths
- All solid bar – no hollow sections
- Galvanized for lasting protection
- Readily adaptable to change of line and level
- Hot-forged finials and backstays
- No welding
- Palings leaded and caulked into copings
- Installed by our own skilled engineers using traditional methods
- Genuine recycled wrought iron available for heritage / listed sites
- Compliant with modern health & safety requirements

The Buxtonia Conservation Railing System has been designed specifically for conservation areas and other similarly sensitive locations. The system embodies traditional methods of manufacture and installation appropriate to areas demanding close attention to detail.

Components are hot-forged and pinned or bolted together with no unsightly welding, all by our own skilled blacksmiths. Hot-dip galvanizing ensures long life. The system is also available in genuine wrought iron at additional cost.

Other paling heads are available or may be made to customers' requirements.

Our design and installation service includes the supply of stone copings, if required.

Dorothea Restorations' unique service also includes the design, manufacture and installation of suitable end-posts, gates, balustrading, arches and other embellishments. Please ask for further details. Visit us online at [www.dorothearestorations.com](http://www.dorothearestorations.com)
